## WORK EXPERIENCE

### LOYALLI

SELF PROJECT / AUGUST 2025 - CURRENTLY

**Loyalli** – a small loyalty card saver, built as an alternative to the discontinued "Stocard". It's fully local-first — no internet required. All data is stored on the user's device using AsyncStorage or SQLite.

#### Tech Stack:

- React Native (Expo)
- <https://loyalli.detlixx.com/>

### STOMA HEALTH APP

MY PROJECT / MARCH 2025 - CURRENTLY

Since early 2025, I have been developing a health application focused on supporting people with stoma care on a global scale. The project is currently paused while awaiting final approval of pre-accepted Eurofunds from a European health funding program. The application is designed to provide both physical and mental support for individuals with stoma. Due to NDA restrictions, further details cannot be disclosed.

#### Tech Stack:

- React Native (Expo)
- NestJS
- MongoDB
- and more

### LITTLE SAVINGS

MY PROJECT / JANUARY 2025 - CURRENTLY

**Little Savings** is a minimalist expense tracker I built entirely solo using React Native. I created it because I needed a fast, no-hassle way to track my daily spendings

\*for short period of time, app was top #36 in Finance on App Store

#### Tech Stack:

- React Native (Expo)
- NestJS
- MongoDB
- Firebase

**Live on the App Store now:**

### STARTUP

MY PROJECT / JANUARY 2025 - CURRENTLY

Since the beginning of 2025, I've been working on my own startup focused on a Health & Medical application for both iOS and Android. I'm leading a small team that includes both developers and designers. The project is still in its early stages as we're currently awaiting approval for funding from EU grants to officially kick things off

## FULL STACK DEVELOPER

FREELANCING / OCTOBER 2024 - CURRENTLY

Over the past few months, I've been working independently, focusing on building my own projects and collaborating with clients directly.

## REVUP

MY PROJECT / AUGUST 2023 - MAY 2025

RevUp is my project where I am developing a React Native app for car, motorcycle, or any type of meetups.

I have been working entirely solo on this project for almost one year. It's my after-work hobby, which is why it has taken so long

### Technologies I use:

- React Native (Expo Go)
- NestJS
- MongoDB
- Firebase
- Others as needed

### Design tools:

- Figma
- Photoshop
- Illustrator (occasionally, as Figma generally meets my needs)

**Socials:** (Maybe you want to be part of our community)

GEARBOX AUTOSERIVS / BRATISLAVA, SLOVAK REPUBLIC / JUNE 2021 - JANUARY 2022

### Automatic Transmission Service Website

This project involved developing a comprehensive website using HTML, CSS, JavaScript, Node.js, Express.js, SQL, and more. The site offered several features

for users, including the ability to sign up, track their purchase and repair history, receive discounts through a newsletter, and more.

Although the company has since dissolved, resulting in the discontinuation of this project

## EDUCATION

### SELF-TAUGHT

IT  
/

I didn't finish school because I saw no real value in it. If your priority is a degree, you're outdated — and I'm not interested in working with your company. If you care about real experience, we can talk. A diploma means nothing today. Thousands graduate every year with GPT-written work and zero actual knowledge
